- ✓ Smart Diagnosis™ 2.0
- ✓ Direct Drive Motor
- ✓ 3rd Rack for Cutlery
- ✓ Slim Control Panel
- ✓ Low Noise - 41dB
- ✓ Hybrid Drying System
- ✓ Aqua Stop

Inverter Direct Drive Motor

LG's Inverter Direct Drive Motor - allows efficient transfer of energy. It optimises the spray intensity for the selected cycle.

Size - it is smaller than a conventional pump system, which increases the tub size.

Greater Durability - and that's why you get LG's 10 Year Parts Warranty.

TrueSteam™ Technology

LG's TrueSteam™ Technology introduces heat into the dishwashing process much sooner than a non steam dishwasher.

Step 1 - Penetrating - Steam molecules penetrate the stubborn food much easier than water.

Step 2 - Soaking - The steam molecules then loosen the dried food.

Step 3 - Melting - Steams high temperature dissolves and detaches tough grime.

Silence On™ (Low Noise)

LG's Silence On™ Dishwashers feature the Direct Drive Motor. This innovation ensures that your dishwasher is the last thing you hear in your kitchen. Experience quietness in dishwashing.

Smart Rack System

LG's Smart Rack System - allows you to easily adjust the tines for flexible loading of bowls, pasta plates and many other types of dishes. If you need more flexibility, simply fold down all the tines. The tall tub will provide the space you need to fit large pans, cookie sheets and tall pasta pots.
