- Headphone Output

Launch Details

Available: May 2015
 RRP^: \$1099

Versatility meets portability with the PW800, featuring 800 Lumen brightness, High Definition native resolution and high contrast ratio.

Watch the big game and other broadcast TV shows up to 100", directly from the built-in HDTV tuner.

A wide range of connectivity options ensures users can display their presentation - whether that be from phone, tablet or a document directly off a USB drive.

The long lasting LED light source runs cooler than a conventional lamp-based projector and can last up to 30,000 hours.

Long Lasting LED Light Source

If you're concerned with bulb-life, don't be. Unlike conventional lamp-based projectors, LED light sources can last up to 30,000 hours. That equates to 4 hours viewing per day for 20 years.

HDTV Tuner

The PW800 is able to receive HDTV signals via the antenna input. Experience the big game or your favourite TV show - on a screen up to 100" from 3.25m.

Excellent Connectivity

The MiniBeam range has excellent connectivity. Watch videos directly from a USB stick on your MiniBeam without the need of a PC. The MiniBeam supports a wide range of file formats, including: DivX HD, MP3, Photo and Microsoft® Office documents. MiniBeam also supports high definition sources such as Blu-ray, game consoles, HDMI and Cable TV. With built-in Miracast and Intel WiDi technology users can wirelessly share content from compatible phones, tablets and computers.
