		GP30NB30
		GP30NW30
		GP30NB40
		GP30NW40

1. If your ODD model is on the above list, upgrade your ODD firmware.
2. Go to lge.com web site and move to 'Product support' menu.  
Then, search for your ODD model. Upgrade to the latest firmware. (It supports Windows 8 OS.)

## ■ Available Bundle Software(Need to check SR Number)

### How to check SR

1. Click “CyberLink PowerDVD” on the top side of the program as the right Picture.
2. Check your SR Number whether it is on the list. (In case that your SR Number is not on the list, upgrade is unavailable)

Available SR Number
MES111206-01
MES111215-02
MES120117-02
MES110322-06
MES111215-03

## ■ Available Software : PowerDVD, Power2Go, PowerProducer

How to upgrade If your software SR is available for Windows 8 upgrade service, refer to the following guide.

1. Open PowerDVD
2. Click  button on the top side, select “Patch” tab and click the latest patch.

1. Open Power2Go then above message will pop-up.
  2. Click the message.
- \* PowerProducer is same as above.

1. Click ‘Download Free Update’ on Cyberlink Upgrade guide page.
2. Download the upgrade file and Install it.
