With LG, It's All Possible

Qualcomm  
**snapdragon**

Smarterly Powered  
**BATTERY**  
10+ HOURS FASTER & LONGER

**FULL HD**

**Optical Image Stabilizer**

Redefine your customers' smartphone experience by giving them true innovation from understanding. LG G2 was created as the next evolution in technology and performance, made possible by learning from their needs. When they speak, it listens. When they touch, it responds. When they ask, it answers.

LG G2 is the first US smartphone to launch with the ultra-powerful Qualcomm® Snapdragon™ 800 processor and it's encased in our most intuitive design thus far. It fuels an engaging user interface that clears the way to conquer every task or take on creativity at every turn. The high-quality camera develops every story flawlessly, while the display brings imagery to life by showing off vivid colors. They can lean on the long-lasting battery all day and engage with an on-device experience that's as personal as their own signature. It is a multifaceted smartphone packed with features to give each one of your customers something to love.

Surpass your customers' expectations and place LG G2 in their hands—it'll make them wonder how they ever lived without it.

# Capture Life's Moments

## 5.2" Full HD IPS Display

Enjoy an immersive viewing experience that fits perfectly in your hand with G2's 5.2" Full HD IPS display. Its sharp, 423 ppi resolution shows off every detail, while its IPS display gives you bright whites and rich colors, with a 16:9 cinema-like presentation.

## 13 MP Optical Image Stabilization (OIS) Camera

Capture sharp pictures and smooth videos with LG G2's 13 MP camera, featuring breakthrough optical image stabilization (OIS) technology. It maintains focus while you hold the camera, for less blur in photos and less shaking in videos—even in low-light settings.

**Scratch-Resistant Sapphire Crystal Glass** – Ensures greater durability and captures clearer images.

**Super Resolution Zoom** – Provides more detail and sharper zoom quality, helping maintain clarity with 8 times the normal digital zoom.

**Multi-Point Autofocus** – Improves focus and depth of field with 9 AF points, especially for images with multiple faces or moving objects.

## Step Design 3,000 mAh SiO+ Battery

LG G2's step design 3,000 mAh battery gives you impressive power, without compromising style. SiO+ technology enables maximum storage capacity and long-lasting efficiency, with a thinner profile than traditional batteries. Plus, the added GRAM chipset saves battery life with up to 20% less power consumption.\*

The step design fills the dead space created by the sloping edges. This gives LG G2 the ability to maximize capacity within the device's slim design.

Smartly Powered  
**BATTERY**  
SiO+ 3,000 FASTER & LONGER

\*The LG G2 Battery utilizes a GRAM chipset that stores and reuses static displays (ex: home screen) so the processor doesn't have to reprocess the same data, therefore enabling up to 20% less power consumption.

## Qualcomm® Snapdragon™ 800 2.26 GHz Quad-Core Processor + 4G LTE

For super-fast performance and a seamless user experience, LG G2 is the first US smartphone powered by the industry-leading processor, and complimented by 4G LTE network speed.\*

\* 4G LTE speed not available everywhere.

# Pick up on True Power

A symmetrical design and slim body provide for an optimized grip feeling.

## Instinctive Design with Refined Rear Key

LG G2's intuitively placed rear key enables smooth, natural navigation. Its clever placement is directly under the finger when held in-hand—making it so easy to use, you'll wonder why it hasn't always been there.

## Near Zero Bezel for Edge-to-Edge Viewing

LG G2's sleek design and sensational near edge-to-edge screen are encased in a narrow 0.1" bezel (2.65 mm) for maximized display area and premium design aesthetic.

0.1" (2.65 mm)

# Enhance Your Experience

## KnockON

A simple knocking gesture is all it takes to wake LG G2's display without picking it up or pressing the power key. LG G2 senses the gesture and turns the display on or off automatically.

## Guest Mode

Customize LG G2's experience with two modes, one for yourself and one for a child or guest, helping keep your personal information and device settings safer.\* Access Guest Mode by unlocking the device with a separate lock screen pattern, letting you control which apps are available for a different user.

\* Some owner/personal content and information may still be accessible to a user in Guest Mode.

## Audio Zoom

Focus in on what you want to hear with Audio Zoom. This unique feature uses multiple stereo mics to amplify sound from a specified angle and de-emphasize the surrounding noise for video recording and playback.

## Plug & Pop

Plug in an earphone or USB Cable to LG G2 and the related features or apps will appear instantly on the home screen.

## Answer Me

When LG G2 is ringing, lift the device to decrease the ringtone volume or bring to your ear to answer an incoming call.

## Dual Recording/Dual Camera

Activate the front and rear cameras simultaneously with Dual Recording/Dual Camera to put both you and your subject in the shot with picture-in-picture technology.

## Shot & Clear

Shot & Clear eliminates unwanted moving objects from the background of your images, for more perfect shots.

## Full HD Video Recording

1080p Video Recording captures more detail and plays it back on-screen, so you can take full HD anywhere you go.

## Tracking Zoom

Tracking Zoom lets you zoom in on a moving subject and follow their actions in a picture-in-picture frame overlapping the background video.

## Zoom to Track

Simply select a moving object on your screen while watching a video, and Zoom to Track follows it throughout the entire clip.

## Capture Plus & Clip Tray

Capture Plus allows you to save a full web page rather than a limited screen capture. And Clip Tray lets you copy and store multiple items—such as full web pages—to a PC-like clipboard that pops up at the bottom of the screen, to save or send a collection of options.

## Slide Aside

Move between up to three apps at once, by using three fingers to slide your current screen aside, and access another app.

## Q Series

**QSlide** - Multitask efficiently with the ability to open two additional windows over your main screen, and adjust their window size and transparency.

**QuickMemo™** - Write or draw on any screen using just a finger, adding a personal touch to everything. And with On-Call Notes, jot down ideas during a call and access them later on from LG G2's call log entry.

**QuickRemote™** - Turn your LG G2 into a programmable remote to control multiple compatible electronic devices such as TVs, cable set-top-boxes, audio systems, and even air conditioners.

## KEY FEATURES

- Powerful Snapdragon™ 800 2.26 GHz Quad-Core Processor
- Long-Lasting Battery - 3,000 mAh SiO+
- Vivid 5.2" 1080p Full HD IPS Display
- 13 MP High Resolution Optical Image Stabilization (OIS) Camera
- Intuitive Rear Key Placement for Ambidextrous Use
- Slide Aside Moves Freely Between Three Apps
- QSlide Layers Windows for Advanced Multitasking
- Clip Tray Saves Multiple Selected Items to a Pop-Up Clipboard
- On-Call Notes Stores a QuickMemo™ in a Call Log Entry
- QuickRemote™ Controls Compatible Home Electronics

## SPECIFICATIONS

- Platform: Android 4.2.2 (Jelly Bean)
- Technology: GSM, UMTS, LTE
- Network: GSM Quad Band/UMTS Tri Band/LTE Quad Band
- Frequencies: GSM 850/900/1800/1900 MHz, UMTS 850/1900/2100, LTE 850/1900/700/AWS
- Data Transmission: EDGE, GPRS Class 10, UMTS (W-CDMA), HSPA+, LTE
- Wi-Fi Connectivity: 802.11a/b/g/n/ac
- Bluetooth Wireless Technology Version 4.0
- Dimensions: 5.45" (H) x 2.79" (W) x 0.35" (D)
- Weight: 5.04 oz.
- Talk Time: up to 17.9 Hours\*
- Internal Memory: 32 GB (Up to 22 GB for User memory)

\* Certain features may use more power and cause actual time to vary.
